

I am glad that New Jersey has a stricter "do not call" provision than the Federal standards permit. I can't believe you guys! You won't let people watch Janet Jackson's breast on TV or listen to Howard Stern on the radio but you'll be more than happy to force people to take phone calls that they do not want. Utopia is a land without the FCC!

You can't pick and choose which constitutional amendments are more important. Together, they comprise the land that our forefathers gave their lives to create.
